3. Make choices as to how you want these documents to print:

- Hide past-due assignments**
- Show assignments given no weight** (these would not typically be graded but might be an assignment like "Read pp. 2-8 on the American Revolution")
- Acknowledgment of learning period days when printing for students.** This makes the "days possible . . . days attended" phrase appear on the report.
- Signature line when printing for students.** Do you want to see a teacher signature and date line to show on the report?
- Include all classes when printing for students.** Do you want to see just one class (the class you are currently in) or all classes the student is enrolled in?

Learning Period: What learning periods do you want to show on this report?

Batch Print: Click on the words "Click here to select students" to show a list of students. If you do not click on this phrase, the report will show as one report for the entire class. A list of students appears. Click on the bottom left button in this box to select all students for an individual report.
